

FOR IMMEDIATE RELEASE
September 22, 2021

We changed our name. Qualis is now Qudol.

Innovative products and capabilities for evolving customer needs.

Framingham, MA, September 22, 2021:

Earlier this year, we [launched Security Master in the Cloud](#), expanding on our commitment to delivering modern solutions that facilitate faster, easier, and more accurate analytics. Qudol Security Master is available as managed cloud, private cloud, or on-prem deployments.

In that spirit, I am excited to announce that we are changing our name from Qualis to Qudol, effective immediately.

The Qudol name change will not affect existing customer implementations; nor will it affect any currently available product features. Our product names will be updated as follows:

- **Qudol Data Refinery:** Our data curation platform. The same powerful time-dimensioning, de-duplicating, and cleansing platform. *ETL is free.*
- **Qudol Security Master:** Our Security Master product that algorithmically links assets across sources and time using a QUID, then delivers to end-user systems as denormalized data tables for any use case.

If you have any questions or are interested in learning more, please [connect with us](#).

Thank you for being part of our journey. We're excited to continue building great things together!

Vale Sundaravel

Founder and President

Qudol has over 25 years of successful partnerships with asset management teams. To book a demo and learn more about how Security Master can simplify your data operations, send us a message at info@securitymaster.com.
